# Boštjan Drinovec: Observation Station K23

22 December 2023–20 January 2024

MMC KIBLA/KiBela

You are kindly invited to the opening of the solo exhibition by **Boštjan Drinovec** *Observation Station K23*, which will take place on **Friday, 22 December 2023, at 7 p. m. at the KiBela space for art.**

Observatories and observation stations can serve many different purposes and, of course, have different forms. Drinovec sees them as kinetic sculptures whose (non-)function depends on their location; they are either outdoors or indoors. While they maintain their presence in both cases, outdoors they are conceived as a kind of weather stations in perpetual motion and indoors as subtle structures made of stainless steel, bearings and a mechanism, characterized by an ingenious construction based on mechanics, sometimes with a touch of electronics and light.

You are invited to use the Observatorij app and enter the exhibition as an observer or actor. The link is valid during the opening hours of MMC KIBLA until the end of the exhibition.
